

AccuDose

Practical, entry-level venturi dilution unit, delivering accurate dilution control in the most arduous environments

AccuDose® and Accudose Select dilution control dispensers are an economical way to dispense a wide variety of automatically diluted solutions into spray bottles, buckets or other containers at the touch of a button. Dilution is controlled by drawing chemicals through metering tips of varying size and injecting this metered amount into the water flow.

Made from durable plastic construction, it is possible to dispense up to 5 products, so it is ideal for dispensing all types of liquid surface and floor cleaning products at the point of use. It's usually situated in kitchens and food preparation areas – or in janitorial rooms where the cleaning chemicals are situated.

Users will also appreciate the ease of operation and low service requirements of the AccuDose line. Simply turn a knob to select the dilution product desired, then push the button to dispense ready-to-use solution. Since each standard button can be converted to lockability in the field, customising the standard systems to individual needs is simpler than ever.

- Versatile and easy to customise with any combination of product configurations
- Dispenses up to 5 products
- Expandable installation
- Better chemical performance – consistent & accurate dilution control
- Time and labour savings – accurately prepared solutions & reduced preparation time
- Improved employee safety – eliminates splashing, spilling, and back strain.
- Environmentally friendly AccuDose dispenser units are available with 2 types of eductors:
- Hydro's E-Gap eductors, which provide backflow protection through use of an elastomeric sleeve.
- Hydro's patented HydroGap II™ Air Gap eductors, which use a 25mm one inch gap of air between the water source and the chemical inlet to provide backflow protection (EN1717 Approved, Category 5).
