

AquaBlend

Precision injection for animal medication

The AquaBlend water-driven injector is specifically engineered to accurately medicate and/or treat water in most agricultural environments.

AquaBlend offers a unique simplified design for customer friendly use in the farms.

AquaBlend is offered in two variable ratio models.

Benefits

- Quick and easy installation
- Unique tool-free maintenance
- Designed to handle both liquid chemicals & wettable powders
- Interchangeable lower ends
- Improved performance at low flows and increased life

Perfect for

- Vaccinating
- Medicating
- Water treatment
- Administering nutrients and supplements

Model No.	Part No. BSP	Flow rate	Injection rate	Operating pressure	Inlet/Outlet Pipe Conn.

0.8% - 5%	117958WSP	10 - 2500 l/hr	1:128 - 1:20 0.78 - 5%-	0.4 - 6.2 bar	3/4" bsp

Accessories

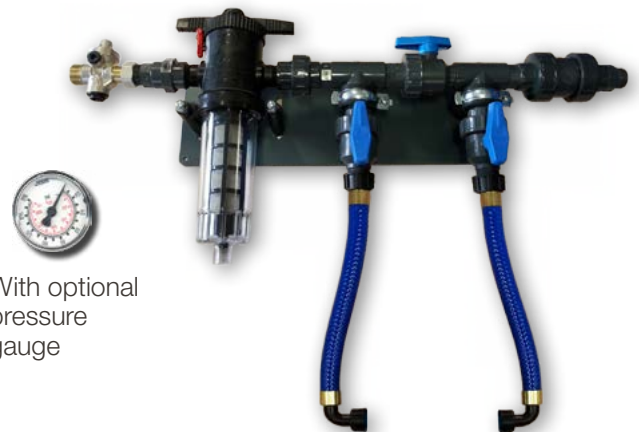

The use of these accessories guarantees a safer operation and extended life for your AquaBlend pump.

TwistII Clean filter

Designed to protect equipment from sediments suspended in a water system. Just a quarter turn of the handle and 5 seconds of back/flush and the filter element is clean!

Bypass Manifold

With optional pressure gauge

Comes with all the parts you need for a professional installation of your chemical injector. Just hang it on the wall and connect the injector.
