

MultiDose

Versatile push-pump chemical dosing system

The MultiDose is an innovative push pump chemical doser designed to deliver precise doses of concentrated chemicals into sinks, bottles, buckets, and other containers. Contemporary appearance makes it ideally suited for publicly accessible areas.

The MultiDose does not require a water line connection as it dispenses concentrated chemical directly into the container.

- Variable dosage (5-30 ml per stroke), selectable at time of installation
- Precise delivery at all dosage rates
- Quick recovery even with thick products

- Option to delay recovery by up to 10 seconds if required
- Hinged discharge spout resists breakage when contacted with equipment, pots and pans, etc.
- Chlorine resistant
- Simplified design with few moving parts, reducing possibility of failure and eliminating downtime

Model	Version	Dose amount mls.
621GB	Bottle-fill	Increments from 5 to 30
623GB	Sink-fill	Increments from 5 to 30
624GB	Bucket-fill	Increments from 5 to 30
