

EvoOne

Versatile push-pump system for accurate chemical dosing

The EvoOne is an innovative push pump chemical doser. Designed to deliver accurate doses of concentrated chemicals into sinks, buckets, bottles and other containers. It's attractive and compact appearance makes it especially suited to customer facing areas, without being intrusive.

The EvoOne does not require a water line connection, dispensing directly into the desired container, allowing it to be versatile in a variety of environments.

- Adjustable dosage (5-30 ml), in increments of 5 ml
- Simple and low cost installation with low service requirements
- Optional lock out system to prevent double dosage
- Exclusivity chemical cap system to prevent the possibility of competitor's chemical's being used.
- Chemical compatibility with a wide range of chemicals (standard and premium seal versions available)
- Simplified design with few moving parts, reducing

- possibility of failure and eliminating downtime
- Optional lockable concentrate cabinet
- Modular wall bracket system for simplicity and flexibility of install (the brackets clip together using a joiner piece)
- Spray bottle, Sink and Bucket fill options available
- Key or Button operation of concentrate cabinet & dispenser priming feature, customisable upon installation
- Branding areas available to allow customisation of dispenser and cabinet.
- Adjustable height bottle shelf to facilitate easy chemical filling
- High quality tubing for delivering chemical (viscous chemical kit available)
