

Mercury

Integrated 3 pump dispenser for laundry applications

The Mercury Laundry system leads the way in bringing reliable modern technology together with simplified user interface. An institutional chemical dispensing system with auto voltage sensing that allows either 115 or 220 volts to be connected to the single power input leads. Combine this with long-life, spring loaded peristaltic pumps, a new Quik-Klip mounting bracket and simplified three button programming and you have the most innovative chemical feed system on the market.

The Mercury Laundry unit is ideal for use in any location such as: hotels and guest houses, health clubs, nursing homes, hospitals, prisons and many more.

- 3 Product dispenser for Detergent, Destainer and Conditioner.
- 6 Modes of operation – Automatic, Sequence, Push Button, Relay, Hot/Cold and SP.
- 4 signal inputs, with signal verification
- Auto Formula select
- Stopwatch Style Programming
- Flush logic and a flush output are available as a standard feature.
